

# AI Bootcamp – Agent Questions & Answers

This document contains example questions and answers for an AI assistant designed to respond to students interested in an Artificial Intelligence Bootcamp.

## **Q: What is this AI Bootcamp about?**

A: This bootcamp is an intensive training program focused on Artificial Intelligence, Machine Learning, and practical applications such as AI Agents, NLP, and Computer Vision.

## **Q: Who can apply to the bootcamp?**

A: The bootcamp is open to students, graduates, and professionals with basic programming knowledge in Python or JavaScript and an interest in AI.

## **Q: Do I need prior experience in AI?**

A: No advanced AI experience is required. We start with fundamentals and progressively move to advanced topics.

## **Q: What technologies will I learn?**

A: You will learn Python, Machine Learning algorithms, Deep Learning, LLMs, AI Agents, APIs, and deployment tools.

## **Q: Is the bootcamp online or in-person?**

A: The bootcamp is delivered in hybrid mode, with both online sessions and in-person workshops.

## **Q: How long does the bootcamp last?**

A: The bootcamp typically lasts between 8 and 12 weeks, including projects and evaluations.

## **Q: Will I work on real projects?**

A: Yes, participants work on real-world projects such as chatbots, AI agents, recommendation systems, and data analysis dashboards.

## **Q: Do you provide a certificate?**

A: Yes, a certificate of completion is provided at the end of the bootcamp.

## **Q: How does the AI agent help students?**

A: The AI agent answers questions about the program, schedule, prerequisites, pricing, and guides students through the registration process.

***Q: How can I register?***

A: You can register by filling out the online application form and our team will contact you for the next steps.
